SCHEEPERS' COLCHICUMS IN A HAPPY LOCATION

## SCHEEPERS' AUTUMN FLOWERING BULBS TO BRIGHTEN YOUR FALL GARDEN

*(They flower a few weeks after planting)*

Planted in August and September they bloom in a few weeks and continue into November, weather permitting. The planting is a permanent one and they will flower in profusion each fall thereafter.

The great pleasure of having quantities of these lovely flowers in our gardens, in the lawn, under the trees, along the bank or driveway or in forgotten corners, in great variety, flowering there through September into October and some varieties even flowering until severe frost puts an end to all this gaiety, is easily within our grasp.

### *Colchicums* (Meadow Saffron)

They produce very large flowers (4 to 6 times the size of the regular Crocus) and the blooms are produced in succession over a long period.

Our bulbs grown at our Holland farms are the very largest that are produced for sale. They give the maximum in results—many times up to 20 flowers from a single bulb.

**AUTUMNALE ALBUM.** Beautiful pure white. \$3.50 for 10; \$8.50 for 25; \$33.00 per 100.

**AUTUMNALE MAJOR.** One of the largest flowering and a rosy purple. \$4.00 for 10; \$9.50 for 25; \$37.00 per 100.

**AUTUMNALE ROSEUM FLORE PLENO.** Double flower of exceptional beauty. Rosy purple. \$4.00 for 10; \$9.50 for 25; \$37.00 per 100.

**THE GIANT.** As the name implies, it is a giant size flower of purest lilac. \$4.75 for 10; \$11.50 for 25; \$45.00 per 100.

**VIOLET QUEEN.** The large flowers have a ground color of lilac with violet tints for an exquisite effect. \$4.75 for 10; \$11.50 for 25; \$45.00 per 100.

**SPECIAL MIXTURE.** Large flowered varieties in a special mixture. \$3.50 for 10; \$8.00 for 25; \$31.00 per 100.

**SPECIOSUS.** Bright violet-blue prettily veined; having orange-red anthers and light yellow throat; large handsome and showy, one of the best for naturalizing in the grass and massing in borders and rock work. \$2.50 for 25; \$8.50 per 100.

# TALL BEARDED IRIS

(June Flowering)

INCREASE GARDEN BEAUTY—  
REDUCE LABOR COSTS

The culture of the Bearded Irises offers no difficulties. But because they will grow under arid conditions, will survive in shade, and bravely assume the part, too often thrust upon them, of rescuing from desolation some garden region where little else will consent to grow, these willing plants are, more often than not, treated with scant consideration and denied the opportunity to develop the full measure of their beauty and mobility. Even so they pluckily grow and blossom; but give them their desire—abundant sunshine, good soil rich in lime and devoid of fresh manure, intelligent watering during dry seasons, particularly when the buds are forming—and the reward in multiplicity of flowers, in their improved color and size and texture, in the sturdy increase of the clumps, will astonish many a one who is under the impression that he is familiar with the manifold charms of color, the perfection of form of these most enchanting flowers.

We have given much careful study to the great number of varieties usually listed. We have noted the many similarities existing, and have finally selected what we would consider a Master List, consisting of the most desirable varieties, so that you may plant all of the following in your garden without danger of regret.

All appear on the list of 100 best, published by the American Iris Society. Dykes Medal Winners received the Highest Award of the Society which is made each year.
